popAI Policy Recommendations

Dr. Xenia Ziouvelou

NCSR Demokritos, xeniaziouvelou@iit.demokritos.gr

Why AI policy and policy recommendations are important? Especially in Law Enforcement?

Because it is important that all of us “together” - policy makers, civil society, practitioners, developers, industry, researchers - we shape a human-centric approach to trustworthy AI; an approach that respects human rights and democratic values; an approach that fosters “trust” in an important area for all, such as Law Enforcement.

How can this be achieved?

The popAI approach to AI Policy Recommendations for LEAs

How popAI addressed this challenge....

- By consolidating **distinct spheres of knowledge**:
 - **Theoretical & empirical knowledge**
 - **by academics & non-academics,**

The diagram illustrates the process of consolidation. A large grey arrow points from the list of knowledge spheres to two overlapping grey rounded rectangles. The top rectangle is labeled "Approach" and the bottom rectangle is labeled "Stakeholder participation".
- in order to offer a unified and integrated European view across LEAs, and provide specialised knowledge outputs (recommendations, etc), while creating an ecosystem that will form the structural basis for **a sustainable and inclusive European AI hub for Law Enforcement.**

popAI Policy Recommendations

Novel Methodological Approach

- A holistic –multiperspective– methodological approach to facilitate the implementation and usage of ‘trusted’ AI tools in the domain of security
- Input from all project activities, WPs, Tasks

popAI policy framework

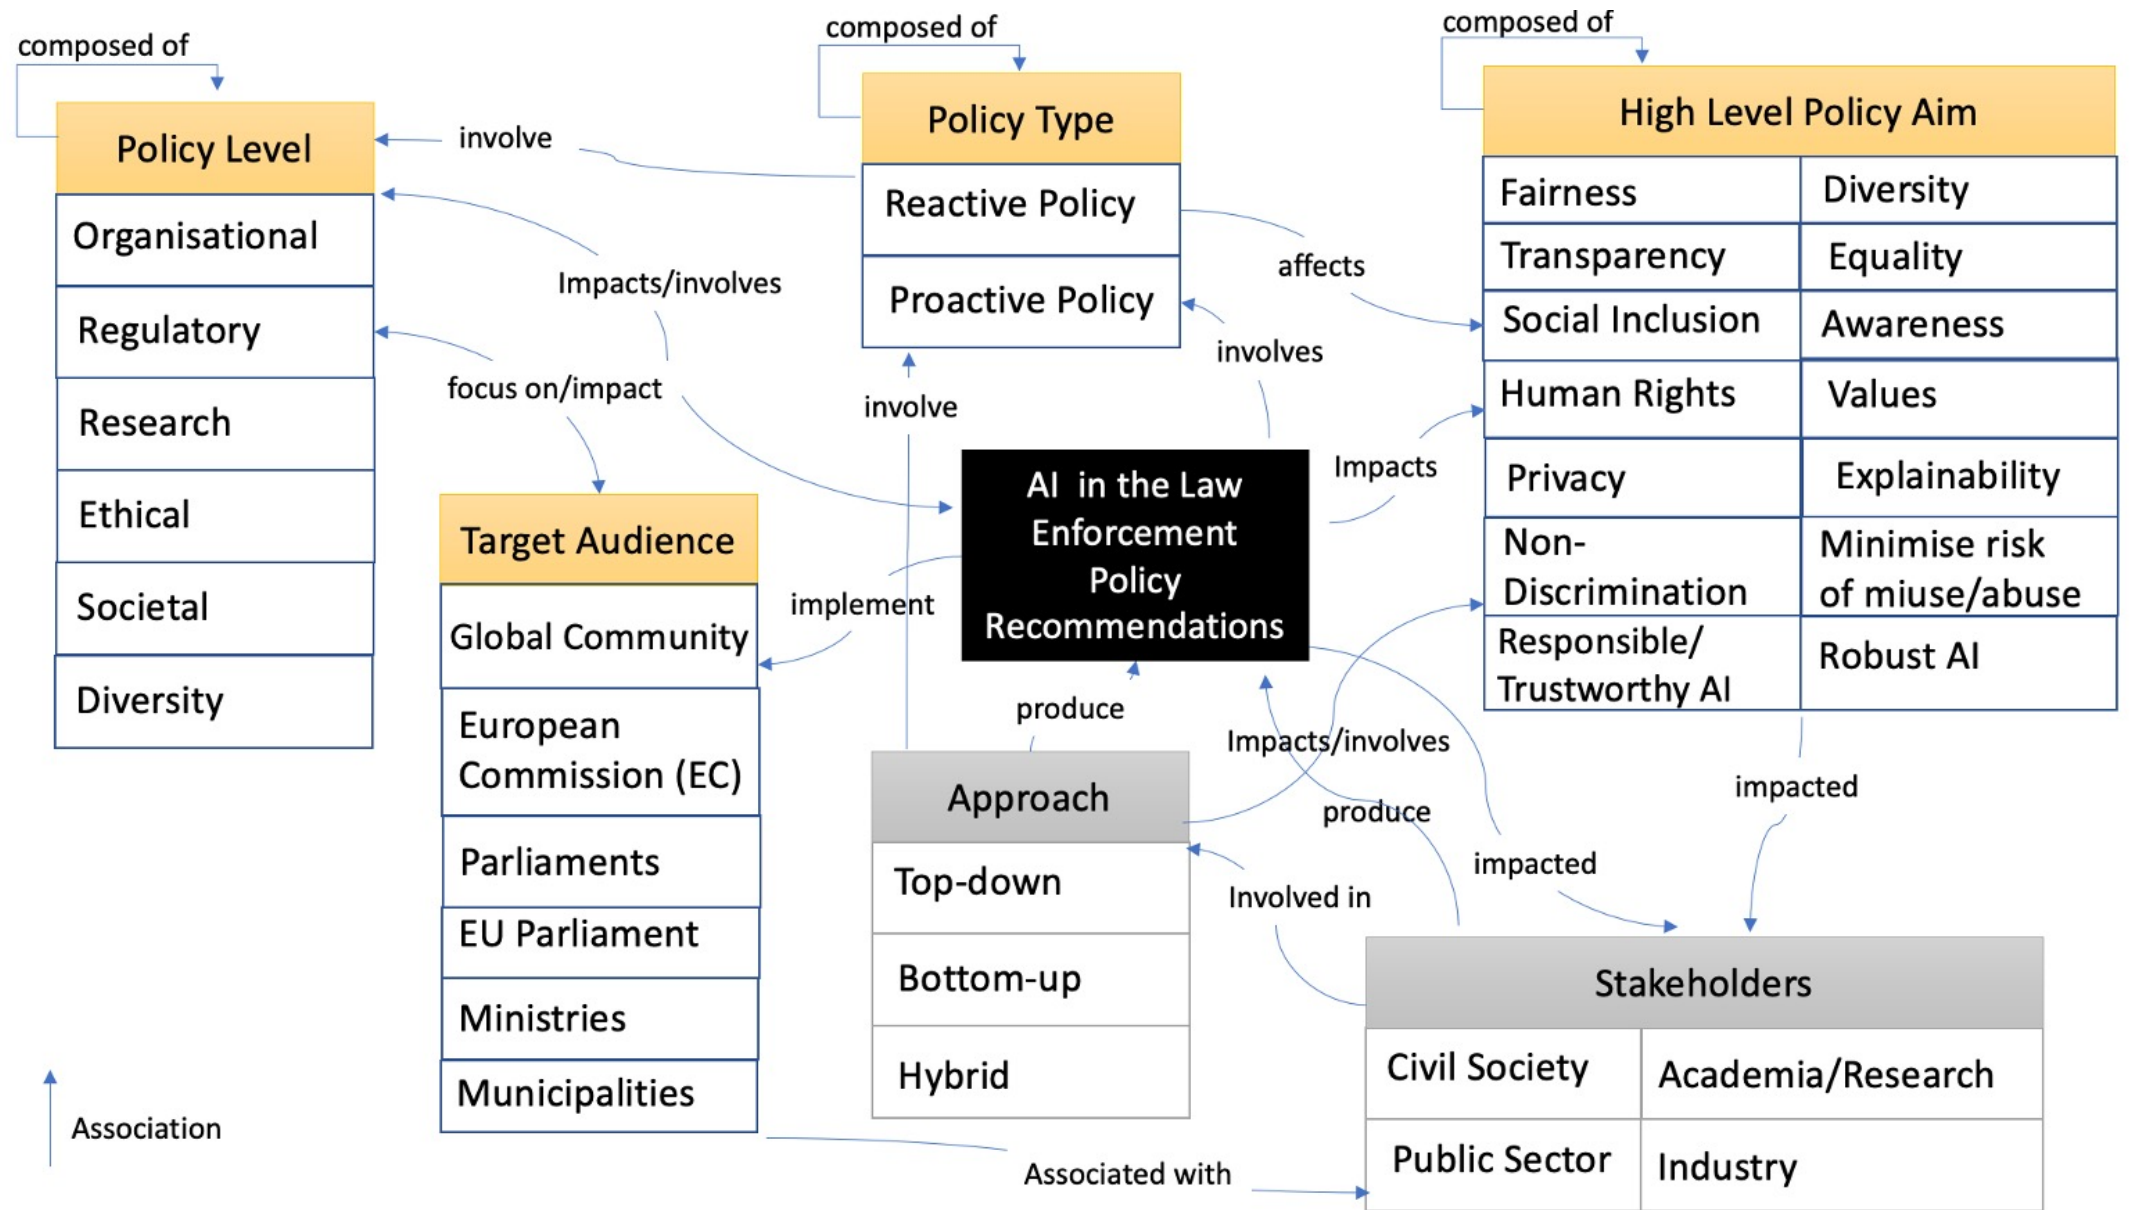

popAI Policy Recommendations

Phases	Phase 1: Bottom-up approach	Phase 2: Top-down approach	Phase 3: Integrated input
	Community-driven policy perspectives for AI in law enforcement across EU <ul style="list-style-type: none">- Policy Lab 1: Greece (May 2022)- Policy Lab 2: Germany (Sep. 2022)- Policy Lab 3: Slovakia (Dec.2022)- Policy Lab 4: Italy (Apr. 2023)- Policy Lab 5: Spain (Apr.2023)- Policy Lab 6: Belgium (Sep 2023)	Literature and expert-driven <ul style="list-style-type: none">- Research findings- Expert input	Integrating policy recommendations <ul style="list-style-type: none">- Collecting input from Phase 1, 2- Integrating input
	Civil society and their representatives (NGOs, etc), practitioners, LEAs, diverse domain experts	Expert-driven perspectives, mainly driven from the project experts	Researchers
	EU	EU	EU

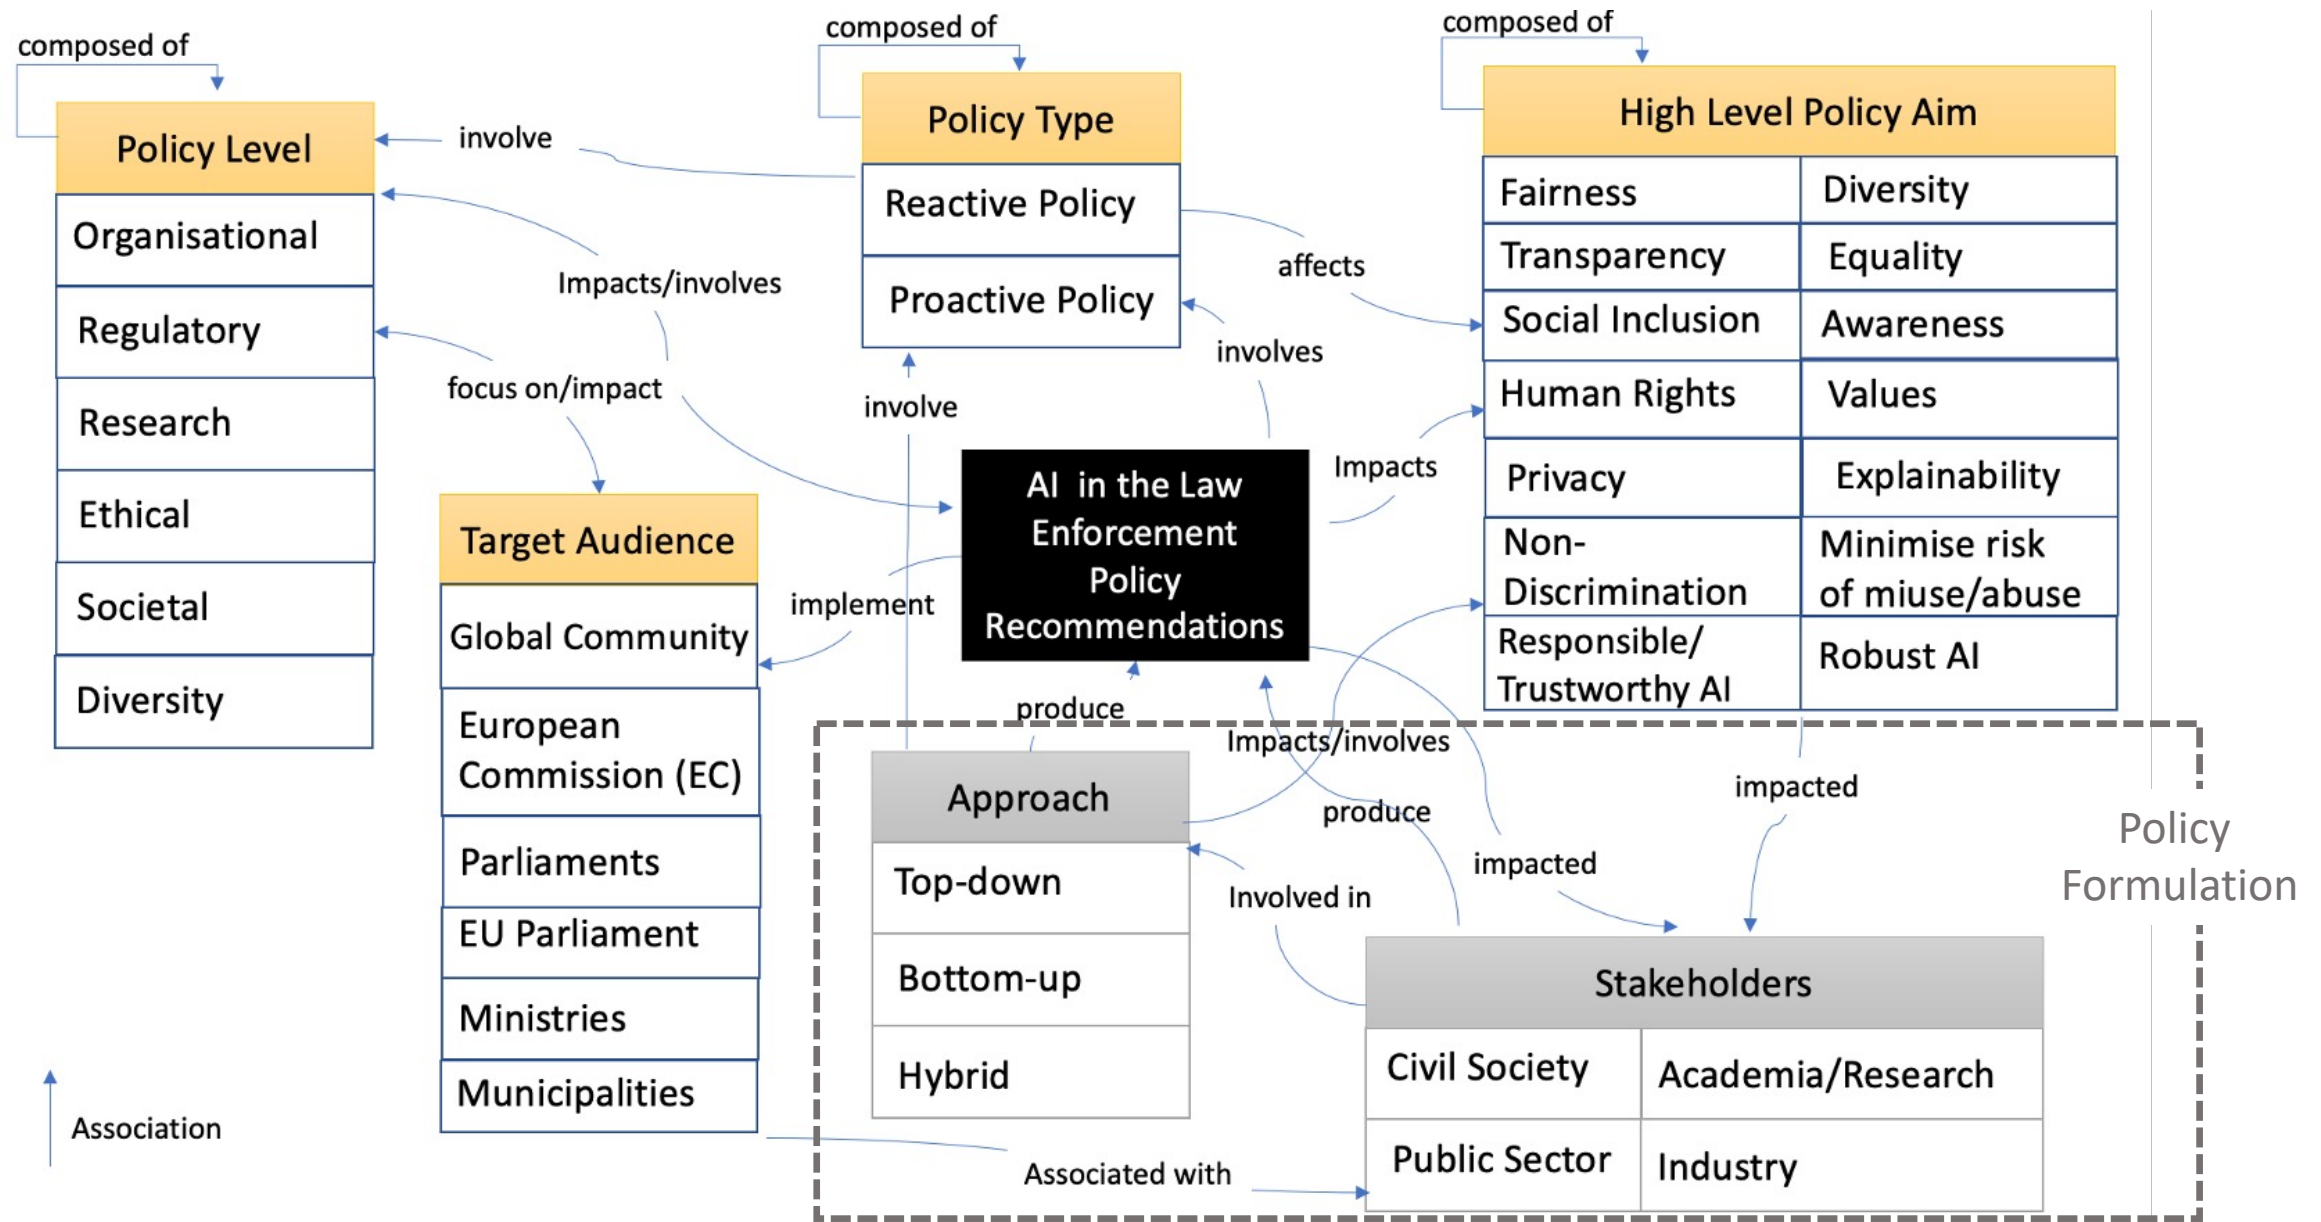

But how can we map and analyse an integrated set of AI policy recommendations for LEAs?

What sort of conceptual tool could enable us to identify and describe the core policy concepts, categories and entities, and the interconnections between them?

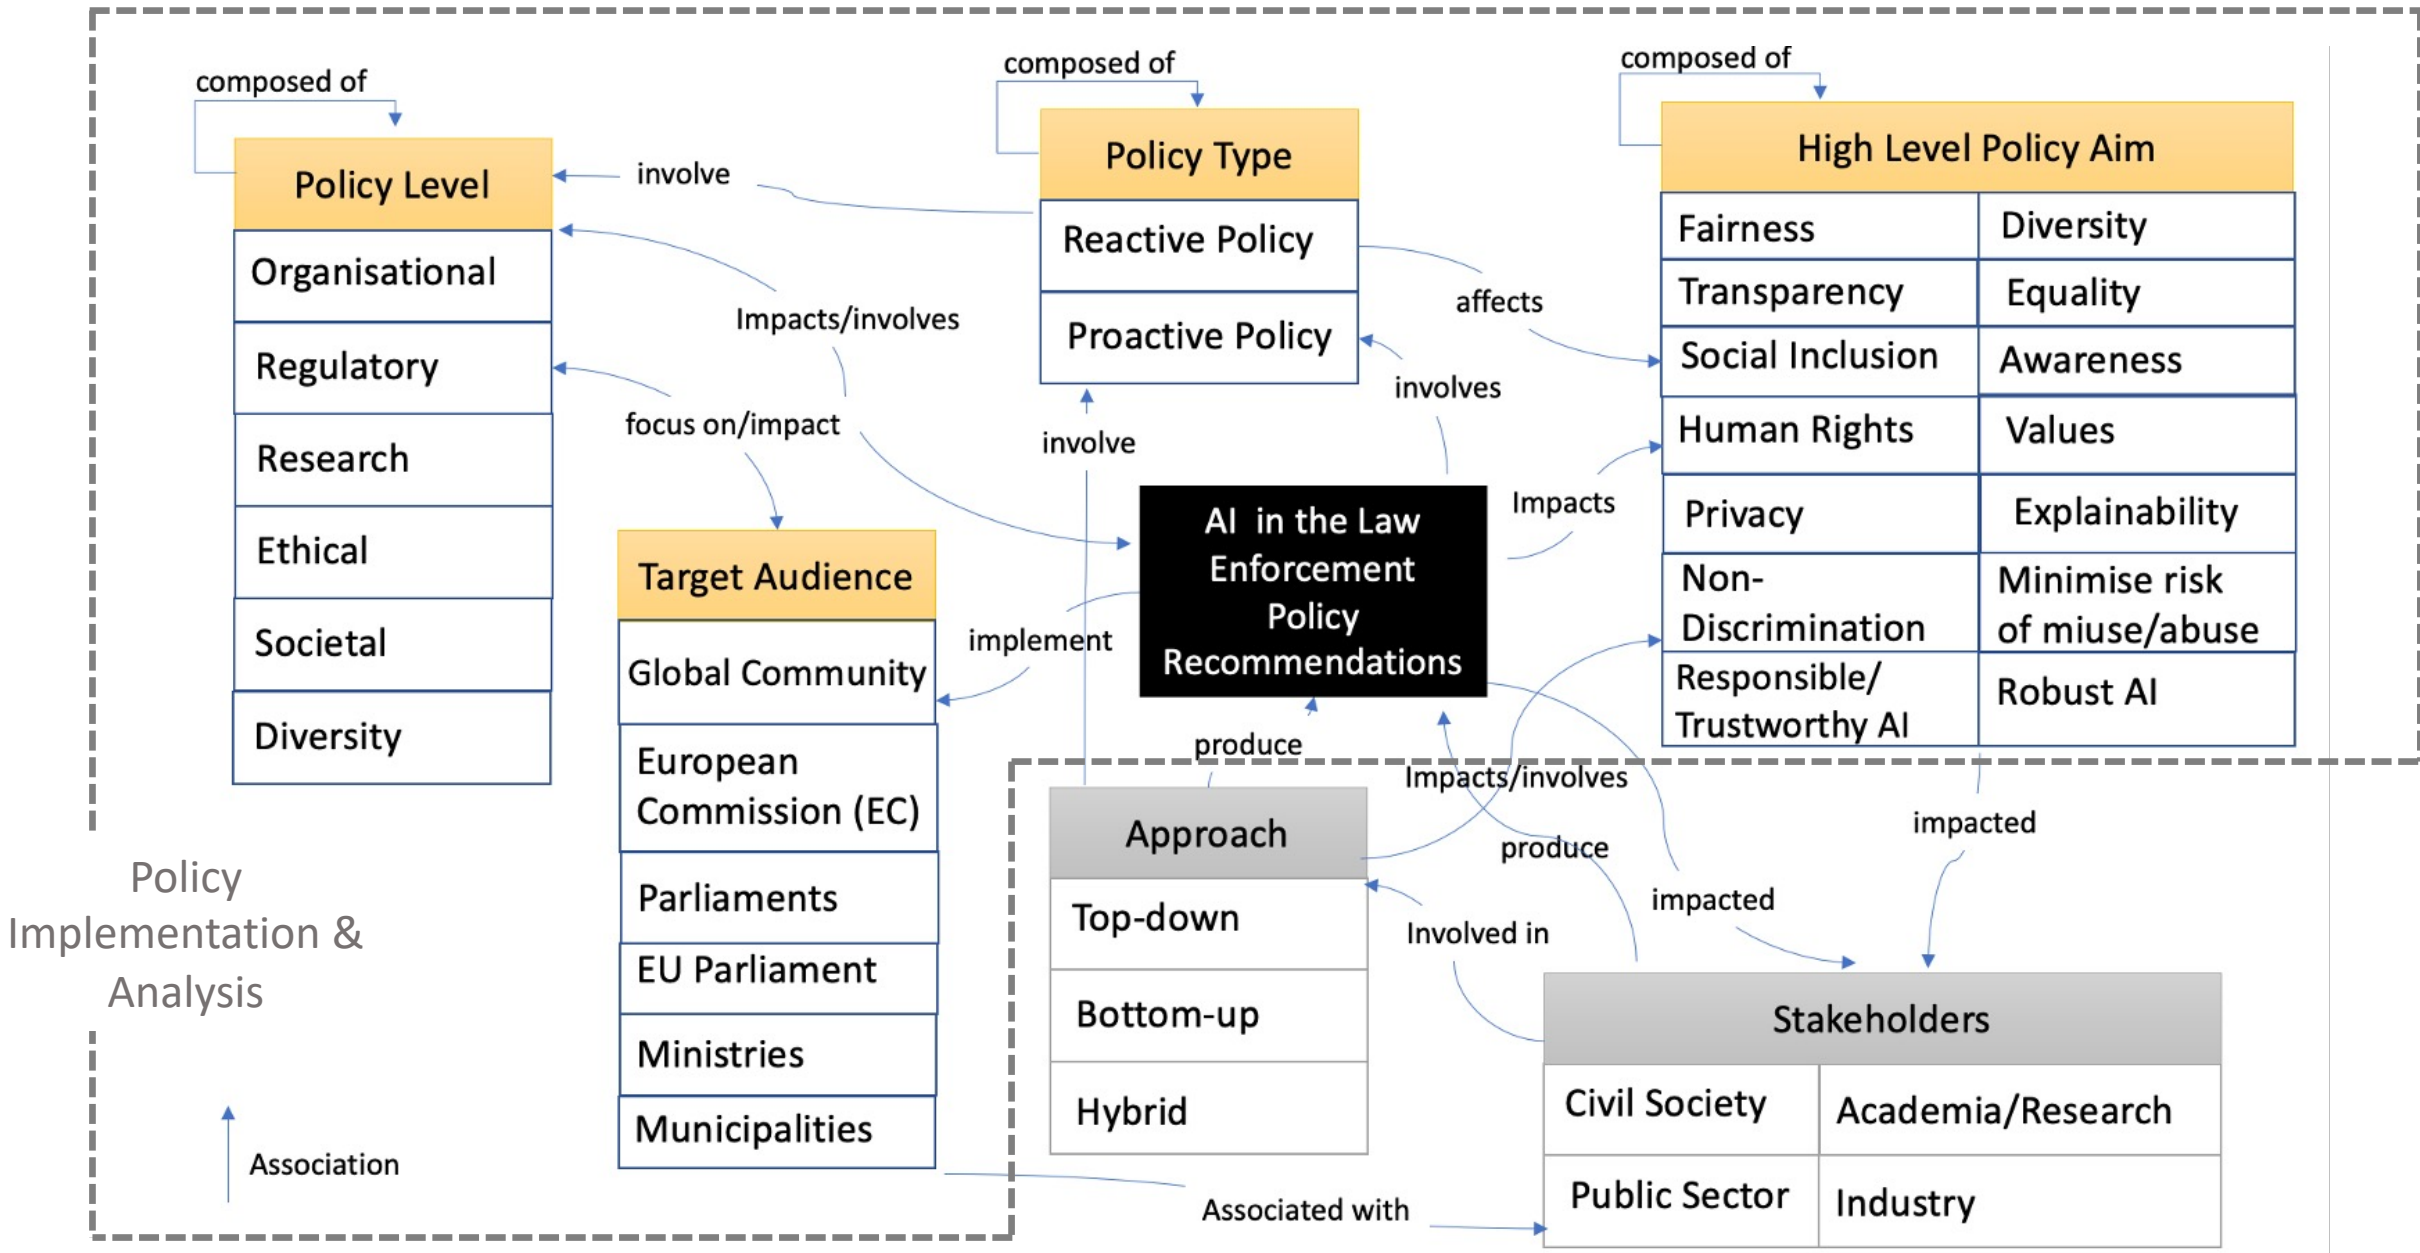

An AI Policy Ontology – As a conceptual tool for mapping the Core Concepts and Relationships for AI Policy Recommendations

An AI Policy Ontology -Core Concepts and Relationships for AI Policy Recommendations

An AI Policy Ontology -Core Concepts and Relationships for AI Policy Recommendations

recommendations overview
(1st Policy Brief Deliverable
D1.6)

9 policy
recommendations
for AI in Law
Enforcement (2022)

* Reactive policy recommendations focus on the current state of affairs. Proactive focus on the future state of affairs (short-term future).

Level	Policy Recommendations	Type of Policy Recommendation		Target Audience	High-level Theme/ Aim of the Recommendation
		Reactive	Proactive		
Ethical Level, Organisational Level	1. EU to support the development of frameworks for the evaluation of AI tools ensuring their ethical, fair, and transparent adoption by public sector			EC DG Home, EU Parliament	Ensure fairness, transparency
Societal Level	2. EU Member States to develop meaningful dialogue with civil society organisations to strengthen citizens' confidence in the use of AI tools in support of the law enforcement authorities			Member States Parliaments, Ministries, Civil Society Organisations and Initiatives	Enhancing transparency, social inclusion, awareness creation
Regulatory Level	3. EU to adopt a European regulation to enhance transparency in the planning, implementation, and use of AI systems with the participation of civil society organisations			European Commission (EC), EU Parliament, Member States Parliaments	Enhancing transparency, inclusion
Organisational Level, Societal Level	4. EU Member States to implement procedures for continuous monitoring of AI systems , with the active participation of civil society organisations, for appropriate employment and use			Member States Parliaments, Ministries	Enhancing transparency, Preserve privacy and human rights, social inclusion
	5. EU to support the development and employment of clear guidelines and procedures for the use of AI systems by LEAs			EU Parliament, Member States Parliaments, Ministries	Minimise risks of abuse and/or misuse, enhance transparency,
Ethical Level, Societal Level	6. EC and EU Member States to ensure that AI systems are inclusive, fair, equitable and non-discriminatory .			EC, EU Parliament, Member States Parliaments, Ministries	Preserve privacy and human rights, fairness, equality, inclusion, non-discrimination
Gender Diversity Level	7. EU to support and invest in the development of guidelines for gender sensitive policing in the AI era.			EC DG Home	To address gender diversity, social inclusion
Research Level (EU-funded research)	8. EU to establish ethics committees that review proposals in the security domain based on potential ethical and societal issues.			European Commission	Ensure development of ethical outputs
	9. EU to promote inclusive participation (stakeholders and countries) regarding EU projects in the security domain			European Commission	Promote inclusivity

17 policy
recommendations for AI in
Law Enforcement (2023)

Policy Recommendations		Type of Policy Recommendation ²		Target Audience	High-level Theme/ Aim of the Recommendation
		Reactive	Proactive		
Ethical Level, Societal Level, Organisational Level, Regulatory Level	1. EU to provide a legal framework for continuous AI training and educational programmes under the AI Literacy notion for LEAs and civil society			EC DG Home, EC, EU Member States, (as well as providers and users of AI systems), Ministries, Municipalities &	AI literacy, Societal Well-being, Preserve privacy human rights and non-discrimination <u>principle</u>
Regulatory Level	2. EU to establish a common, harmonized, European AI regulation for LEAs , that will govern the entire process from the design to the implementation and final use of AI systems by law enforcement authorities.			European Commission, European Parliament	Enhance transparency and fairness
Organisational Level, Ethical Level, Societal Level, (PRIOR TO USE)	3 Develop clear guidelines and standards for the collection, storage, restriction and use of biometric data by LEAs			EC DG Home, DG Just	Avoid risk of discriminatory use of data
	4. Carrying out impact assessments even in cases when this is not obligatory by law			EU and MS legislative bodies	Respect for Fundamental Human Rights, Ethics, Democracy and Rule of Law
	5 Establishment and standardisation of a holistic Impact Assessment procedure			EU and MS legislative bodies	Respect for Fundamental Human Rights, Ethics, Democracy and Rule of Law
	6. Establishment of lawfulness, transparency and accountability protocols for LEAs			EU legislative bodies along with EU Member States	Lawfulness, transparency, <u>accountability</u> and <u>auditability</u>
Organisational Level, Ethical Level, Societal Level (USE)	7.EU to support the development of guidelines designed especially for the use of AI systems by LEAs .			European Parliament	Minimise risks of abuse or misuse, enhance transparency
	8.Formulating a general ethical framework for the use of AI tools , <u>taking into account</u> that the AI Regulation can only regulate the basic legal framework for the use of AI			EU Parliament, Member States, universities, police academies, scientific projects consortiums,	Preserve the public order, <u>Preserve</u> privacy and human rights, Transparency in using the AI tools
	9.EU to ensure that the use of AI tools by police officers must be subject to multi-level control			Member States, Ministries, Police Presidium and/or other authorities responsible for using AI tools	Transparency in using AI tools
Organisational Level, Ethical Level (AFTER USE/USE)	10. EU to establish a procedure for the <u>evaluation of AI tools used by LEAs</u> , from the ethical point of view			European Parliament	Ensure fairness, transparency and ethical use
	11. EU Member States to support the continuous monitoring of AI systems in use, <u>taking into account</u> the perspective of civil society organisations.			EU Member States	Enhance transparency, Preserve privacy and human rights
	12. Establish a European AI Systems Registry that will hold basic information about each AI System used by each LEA/per country and its records will be accessible to all EU citizens.			European Commission, EU Member States	Enhance transparency, Ensure fairness,

In conclusion.....

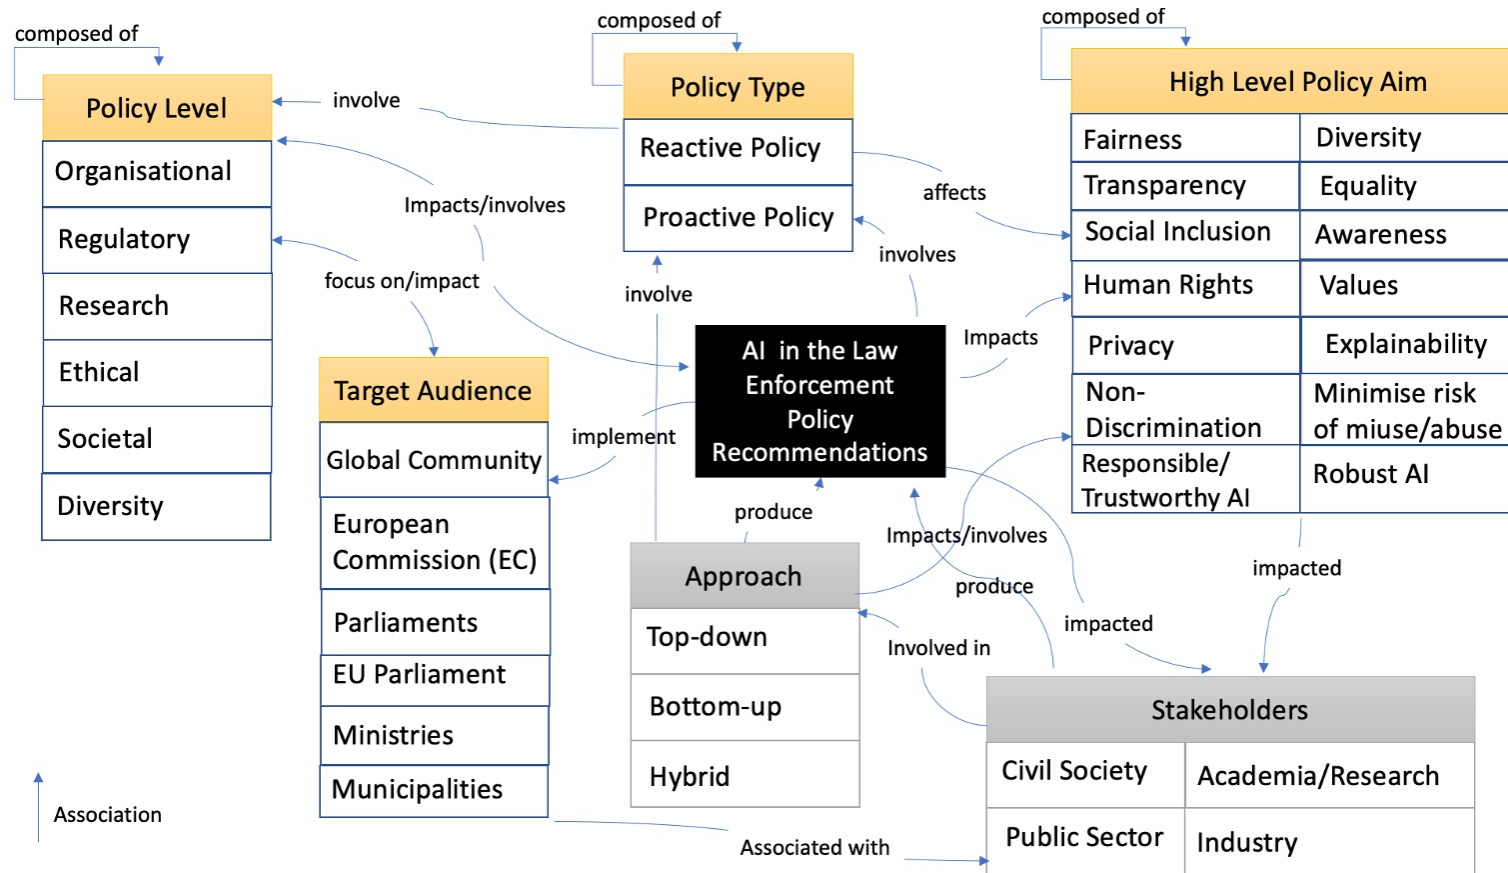

Aiming to **foster trust**
in AI for the security domain
popAI provides a holistic -
multi-perspective, multi-
stakeholder- AI policy
recommendations
that aim to respond to
our evolving technology-
enabled environment,
taking into consideration the
multiple voices of our society.
